

Apple Vision Pro

An Experience for Our Customers

A Curated Demo Experience: Apple Vision Pro

Now is a great time to join Compucom for a special “Only at Apple” experience led by Apple Vision Pro Specialists. This curated demo engagement is a great way to experience spatial computing, inspiring new ways of getting work done, and highlighting the possibilities that Apple Vision Pro can bring to your business. You can explore spatial computing through a demonstration of best-in class enterprise apps across various industries at one of the following Apple Executive Briefing Centers:

Apple Park, CA New York City, NY Austin, TX

The goal of this experience is to provide you with a clear understanding of spatial computing – including the Apple Vision Pro experience, the technology behind it, and its full capabilities. This engagement will:

- Enable you to garner insights that take advantage of exclusive enterprise apps.
- Align with the right resources from both Apple and Compucom to help you start your spatial computing journey.
- Define clear and actionable next steps— including where to start, available resources, and other requirements needed to progress your adoption of spatial computing.

Agenda

Introduction: About Apple Vision Pro and Spatial Computing. *45 minutes*

This will cover an overview of the technology and features that enable the breakthrough spatial experience that Apple Vision Pro delivers. You will gain insight into real-world applications across multiple industries that illustrate how enterprises are leveraging the power of spatial computing.

Inspiration: A Curated Demo Experience. *1 hour*

This session begins with a personalized Apple Vision Pro fit for each attendee— including guided enrollment and navigation of visionOS. You will have the opportunity to explore the capabilities of spatial computing through a demonstration of exclusive enterprise applications across a number of use cases.

Ideation: Art of the Possible. *30 minutes*

This debrief session is meant to capture impressions and feedback from the demonstration experience. You will collaborate and discuss potential use cases that are applicable across your various teams—or across your entire organization. We will then align on next steps, including Apple resources and support to guide you as you design and build your own spatial computing journey.

How to Schedule your Engagement

You should work with your Compucom Account Manager or your Apple Account Manager to schedule a briefing at one of the above-listed locations. Email the company name, company contact(s), contact phone, and contact email of the appropriate people to invite. Also provide a set of preferred dates and times (or preferred weeks). Customers will be vetted and reviewed by Apple sales leaders.
